Dear Mr. Burrows:

Thank you for your report on our DX Test of March 8, 1992. It is my pleasure to confirm your reception of **KPCR.**

At the request of Mr. Wayne Heinen of the National Radio Club Public Relations Committee we scheduled a test broadcast on 1530 KHz from 12:00 Midnight CST to 5:00 AM CST. **KPCR** equipment was a Harris MW-1A solid state transmitter operating at 1,000 Watts into a 348 foot guyed tower, an Inovonics 222 Processor/Limiter, a Gates Solid State AGC, and an LPB Stereo Console using the Mono Mixdown output. Code ID was prerecorded on a tape cartridge twice with voice ID between the code ID's. Music and program material was from CD's, 45 RPM and 33 1/3 RPM records and cassette tape. Control room microphone is an Electrovoice 635A.

KPCR is a daytime AM station usually simulcast with **KPCR-FM,** a 25,000 Watt FM station on 94.1 MHz. We specialize in Country Music, news, farm markets, and informal talk. We are all live (no automation) and we pride ourselves on community service and involvement. Our studio/transmitter building is a big red barn, and we are referred to as "The Cowpasture Radio Station". **KPCR** first went on the air in December 1966.

During Sunday's test I received 4 telephone calls from DX listeners. One from Seattle, WA, one from Long Island, NY and two from New Jersey. Your mailed-in report was one of thirteen received so far. Your logging and your comments were quite accurate according to my records. Thank you for being part of our New Jersey audience. Your state had more reports than any other.

I am founder, president, general manager and chief engineer for **KPCR** and I served as announcer for the test program. I really did enjoy the test and I appreciate your report. Thanks again.

Sincerely,

J. Paul Salois
